Specializing in Custom Cars and Motorcycles

Dale's is a busy shop. We paint 3 cars or custom Harleys every day. We have been using the Bugs Off® Detailing Pads for a few months now to remove overspray and detail the vehicle with only soap & water before returning it to the customer. It does the job!

It's easier to use, faster, less expensive, and lasts much longer than a clay bar. If we drop it we just rinse it out and continue working. It allows us to clean the whole car just once.

Great Product!!!
