

AMERICA'S BODYSHOP®

June 20, 2017

REF: Awesome Products Corp.

To Whom it may concern:

I have operated a high volume Maaco shop for many years and we get our share of overspray problems. The usual correction has been clay bar, compound, or chemical clean. All of these options are slow and expensive

I was pleasantly surprised when Don gave me some of his pads to try. They were very effective most of the time and do not mark moldings or plastic. They are also good for general detail, glass, and wheels.

This product is worth a try as it will save time and money.

Sincerely,

Trevor Parker
